Yanqing (Lucis) Li

Greater Vancouver Area | 250-884-9627 | **lilucis.work@gmail.com** | **LinkedIn Profile** | **Project Portfolio**

Education

University of British Columbia (Sauder School of Business) **Sep 2026 – Aug 2027 (Expected)**
Master of Business Analytics *Vancouver, BC*

New York Institute of Technology (NYIT) | Graduated with Distinction (GPA: 3.84/4.00) **Sep 2021 - May 2023**
Master of Science, Cybersecurity *Vancouver, BC*

University of Victoria (UVic) | UVic Pathway Program – Science/Engineering Scholarship **Sep 2017 - Aug 2021**
Bachelor of Science, Statistics and Mathematics, minor in Business *Victoria, BC*

Selected Projects

Vancouver Parking & Road Safety Analytics *Python | Data Analytics | Tableau | Geospatial Analysis*

- Developed and standardized 2.47 million Vancouver ticket records, normalizing address for geographic matching.
- Built interactive Folium maps to explore enforcement hotspots, yearly trends, and road-level patterns.
- Integrated ICBC collision data to compare parking-enforcement and collision patterns for insight planning.

Mortgage Financial Planner *Python, Streamlit, Plotly,Financial Modeling, Scenario Analysis, Data Visualization*

- Developed an interactive application to compare mortgage affordability, cash flow, and rent-or-buy scenarios analysis.
- Modeled income, assets, mortgage payments, expenses, and cash reserves to evaluate purchase scenarios and liquidity.
- Built interactive visualizations to explore how changes in interest rates, income, and housing costs affect affordability.

EEG Signal Classification *Python, Signal Processing, Machine Learning*

- Processed EEG recordings and explored classification models to identify patterns in brain responses.
- Analyzed prediction performance and processing time as part of a team-based BR41N.IO hackathon project.
- Visualized EEG signals and classification results to communicate findings during the hackathon presentation.

Skills

Programming& Tools: Python (Pandas, NumPy, SciPy, Matplotlib, scikit-learn, gurobipy, gensim), SQL, R, Excel, Git
Data Analytics: Data Cleaning & Analysis, Data Visualization, Data Validation & Quality Assurance, Machine Learning
Statistical Analysis: Statistical Inference, Hypothesis Testing, Regression & Time Series Analysis, Experimental Design
Finance & Accounting: Corporate Finance, Financial Management, Financial Reconciliation, Financial Reporting
Operations & Optimization: Linear Programming, Scenario Analysis, Sensitivity Analysis, Gurobi Optimization
Information Security: Data Protection, Cryptography, Digital Forensics, Risk Assessment, Compliance Management

Experience

BC Housing **Jan 2024 - Apr 2024**
Quality Assistant *Burnaby, BC*

- Validated housing subsidy records, eligibility, and rent calculations to ensure data accuracy and compliance.
- Reviewed annual financial reports, subsidy allocations, and funding requirements across multiple housing programs.
- Conducted Excel-based financial reconciliations to identify discrepancies and support accurate subsidy administration.
- Guided staff from non-profit organizations navigating the Housing Registry system and following program procedures.

New York Institute of Technology (NYIT) **Jan 2023 - May 2023**
Teaching Assistant - Introduction to Algorithms *Burnaby, BC*

- Supported algorithm instruction for 40 students by preparing instructional materials and clarifying technical concepts.
- Streamlined grading workflows, reducing grading time by 50% while maintaining accuracy and consistency.
- Provided individualized academic guidance on problem-solving and course assignments to support student learning.

PAQT | Graduate Capstone Project **Jan 2023 - May 2023**
Business & Technical Analyst *Remote, BC*

- Collaborated with a startup to design and implement an end-to-end digital signing workflow within its online platform.
- Integrated digital signature with email to support document execution and automated communication workflows.
- Conducted end-to-end testing and validation to verify system functionality and workflow reliability.
- Coordinated project milestones, technical research, and documentation to support successful system delivery.
