Yanqing Li

Greater Vancouver Area, BC,CA| 250-884-9627 | lilucis.work@gmail.com | LinkedIn_Profile

Summary:

Analytical professional with a multidisciplinary background in Statistics, Mathematics, Cybersecurity, and Business Analytics. Experienced in data analysis and validation, financial reconciliation, program compliance, and system implementation and optimization. Skilled in data analysis, quantitative modelling, and translating complex information into actionable insights to support business operations, stakeholder communication, and informed decision-making across diverse organizational environments, with a focus on process improvement, operational efficiency, and clear solutions.

Education:

University of British Columbia (Sauder School of Business) **Sep 2026 – Expected Aug 2027**
Master of Business Analytics *Vancouver, BC*

New York Institute of Technology (NYIT) | Graduated with Distinction (GPA: 3.84/4.00) **Sep 2021 - May 2023**
Master of Science, Cybersecurity *Vancouver, BC*

University of Victoria (UVIC) | UVic Pathway Program – Science/Engineering Scholarship **Sep 2017 - Aug 2021**
Bachelor of Science, Statistics and Mathematics, minor in Business *Victoria, BC*

Skills:

Programming: Python (pandas, NumPy, SciPy, Matplotlib, scikit-learn, NLTK, gurobipy, gensim), R, SQL, Git
Data Analytics: Data Cleaning & Analysis, Data Visualization, Data Validation & Quality Assurance, Machine Learning
Statistical Analysis: Statistical Inference, Hypothesis Testing, Regression, Time Series Analysis, Experimental Design
Quantitative Analysis: Probability Theory, Stochastic & Mathematical Modelling, Scenario Analysis, Decision Support
Finance & Accounting: Corporate Finance, Financial Management, Financial Reconciliation, Financial Reporting
Operations & Optimization: Linear Programming, Network Flow Optimization, Sensitivity Analysis, Gurobi Optimizer
Information Security: Data Protection, Cryptography, Digital Forensics, Risk Assessment, Compliance Management
Business Administration: Executive Support, Records Management, Document Control, Process Improvement
Project Management: Project Coordination, Stakeholder Engagement, Project Status Reporting, Project Documentation

Experience:

BC Housing **Jan 2024 - Apr 2024**
Quality Assistant *Burnaby, BC*

- Validated housing subsidy records, eligibility, and rent calculations to ensure data accuracy and compliance.
- Reviewed annual financial reports, subsidy allocations, and funding requirements across multiple housing programs.
- Conducted Excel-based financial reconciliations to identify discrepancies and support accurate subsidy administration.
- Guided staff from non-profit organizations navigating the Housing Registry system and following program procedures.

New York Institute of Technology (NYIT) **Jan 2023 - May 2023**
Teaching Assistant of Introduction to Algorithm *Burnaby, BC*

- Supported algorithm instruction for 40 students by preparing instructional materials and clarifying technical concepts.
- Streamlined grading workflows, reducing grading time by 50% while maintaining accuracy and consistency.
- Provided individualized academic guidance on problem-solving and course assignments to support student learning.

PAQT[Graduate Capstone Project] **Jan 2023 - May 2023**
Business & Technical Analyst *Remote, BC*

- Collaborated with a startup to design and implement an end-to-end digital signing workflow within its online platform.
- Integrated digital signature with email to support document execution and automated communication workflows.
- Conducted end-to-end testing and validation to verify system functionality and workflow reliability.
- Coordinated project milestones, technical research, and documentation to support successful system delivery.

Selected Academic Projects:

EEG Data Analysis – Mind Music Game **Mar 2023 – Apr 2023**
Virtual BR41N.IO Hackathon | Academic Project *Burnaby, BC*

- Applied machine learning techniques, including KNN, to analyze EEG signals and developed EEG-signal music game.
- Achieved over 95% classification accuracy using a KNN model and presented the project in an online hackathon.
